

## ***Press release***

### **Industrial partnership between Venture Orbital Systems and ESTACA**

**Venture Orbital Systems signs an industrial partnership with ISAE-ESTACA, in order to develop its industrial relations, create an internship program for future aerospace engineers, and develop joint projects.**

Venture Orbital Systems and ESTACA have agreed to implement joint or concerted actions with a view to defining the framework for future initiatives and joint actions to link the school's academic offer with the company's industrial demand in the fields of aeronautical, automotive, space and rail transport.

Their objective is to increase the company's notoriety among students, young graduates and alumni as well as the teaching staff to the benefit of the development of joint projects in the above-mentioned fields.

Their objective is to increase the school's notoriety among employees, the different recruitment departments, managers and the company's management for the benefit of a wide communication.

This partnership is important for Venture Orbital Systems, as the majority of its team comes from ESTACA.

Finally, this partnership also allows Venture Orbital Systems to have the honor of adding Jacques Gigou, former ESA Launchers Directorate, and member of the ESTACA governance to their Advisory Board.
